ATLAS Project Presents:

Futures Forum

November 16, 2011
12-1 PM
College Center

Email, Wifi, and Beyond: Technology for IVC Students

Imperial Valley College is committed to empowering students, faculty, and staff to succeed in today's high-tech world. As we begin our second year of implementation of our Strategic Technology Plan, many new and exciting services are on the horizon.

This Futures Forum is focused on students and their experience as an IVC learner. It will provide an opportunity for students to interact with campus technology leaders to discuss technology on campus and where we're headed as a learning institution. It will also provide technology leaders an opportunity to hear from students to better understand their needs and interests related to technology.

Come join this interactive forum and help shape IVC's future! Practical information related to technology services will also be shared to ensure we make the most of our technology resources on campus.
