

Summer 2009
MATH 80 and MATH 90 for Online Students

Note: **Please do not email me to add the course until June 22, 2009**

There is **NO on-campus orientation** for this class. On the first day of classes, go to the IVC Distance Education website and read the instructions and view the orientation videos for general info, as well as for logging in to the **Etudes** coursemanagement system and **MYMATHLAB**. The videos will explain how the class will work and what you can expect and it is very important for you to take the time to see them.

Remember, you must use your Student Identification number which starts with a G, not your social security number for log-in purposes. Then LOG IN to Etudes. If you have problems logging in, contact the Student Help Desk at **760-259-3419**.

Once you have logged in to Etudes, click on the course tab for the MATH class and review the course syllabus, schedule, and modules. Most of your work will be done in the MYMATHLAB program, which you need to buy. You may buy that from the bookstore or online (see How to buy & register in MYMATHLAB in your syllabus section)

There will be on-campus exams. Please check the Course Syllabus for these dates. **If you do not log on and complete Module 1(along with HW 1) by the deadline (6/24/2009 at 9 a.m.), you will be dropped from the course.**

If you are adding the course, you must register immediately after receiving the add code from the instructor (by email). It will take at least 24 hours after you add the class before you will be able to log in to Etudes, however you have full access to MYMATHLAB as soon as you buy the program; so don't wait or you will get behind in the course work.

You need to buy your MYMATHLAB program immediately.

The program required for this class are as follows:

MYMATHLAB, which includes your textbook in the e-book format

(to buy on-line go to coursecompass.com, in the student section go to buy access, and follow the prompts.

The MYMATHLAB code for the MATH 80 class is: shokoufi 38484

The MYMATHLA code for the MATH 90 class is: shokoufi 81862

Make sure you get the right program for the class.

If you have any questions or want to add the class, please email the instructor at mardjan.shokoufi@imperial.edu

See you Online!
