

IMPERIAL VALLEY COLLEGE

2017-2018 Catalog

Imperial Valley College welcomes you and wishes to take this opportunity to congratulate you on your decision to accept the challenge of further education. This catalog is your guide to and through this college and the many educational programs which it offers. You will find the information which you must have to succeed and those rules and regulations which govern the college and each student. It is your obligation to become thoroughly familiar with the content of the catalog. It has been prepared with your success in mind!

Imperial Valley College President's Message

Congratulations on joining the long list of Valley residents who have made Imperial Valley College their choice for higher education. I am proud to say I am also part of that group.

There has never been a more exciting time to be a student at IVC.

Our June 2017 graduating class is again a record number. That has become routine over the past five years as our graduation numbers have increased significantly. Those numbers have led us to now hold two ceremonies.

Meanwhile, through cooperative partnerships, IVC has also taken a lead role in creating new bachelor's degree options for our students. Our innovative Imperial Valley University Partnership with San Diego State University and the County Office of Education, established in 2011, was just the beginning.

Since then, through additional University partnerships, our students now can start at IVC then seamlessly finish their degrees at CETYS. Or they can choose to attend the Yuma campuses of Northern Arizona University or the University of Arizona. And beginning in the 2017-18 academic year Columbia College-- a leading private school in Columbia, Missouri--has been added with a combination of on-line and on ground classes on the IVC campus.

Our objective is to provide our students new opportunities to finish their bachelor's degree here in the Valley. In the career-technical fields, we are also instituting new fast-track programs. If you are interested in any of those programs, I encourage you to contact our counseling department.

And our campus is continuing to grow. Just recently, we opened a 3-megawatt solar field, using 17 acres of land just north of our campus.

We are seeking to meet both the educational and personal needs of our students to ensure the opportunity for student success. Veteran students can receive assistance through our Military and Veterans Success Center, which is open to all veterans of any age. And we also recently opened a Food Pantry in a partnership with the Imperial Valley Food Bank to provide food for our students who are food insecure.

I encourage you to take advantage of these and the myriad of other student programs we offer here at your college.

I wish you the best in your educational career and have a great school year!

A handwritten signature in black ink on a light background. The signature is written in a cursive style and reads "Victor M. Jaime".

Victor M. Jaime, Ed.D.
Superintendent/President

Board of Trustees

Imperial Valley College is part of the Imperial Community College District.

The Imperial Community College District's Board of Trustees is an independent policy-making body that reflects the public interest in board activities and decisions. A seven-member Board of Trustees is elected by trustee area.

It is the responsibility of each Board member to represent the interests of his or her respective area. Board members take seriously their obligation to represent the overall public interest and to maintain continuity in the leadership of the Imperial Community College District.

HISTORY OF THE COLLEGE

Imperial Valley College is celebrating its 55th anniversary of the Aten Road campus in 2017. The opening of the IVC campus in September of 1962 was the culmination of years of hard work by visionary citizens to finance and build a freestanding community college in Imperial County.

Work to establish what today is the Imperial Community College District had originated three years before the opening of the IVC campus. The State Department of Education approved a recommendation on July 10, 1959 to establish a community college district in Imperial County. The Imperial County Superintendent of Schools then set a date for an election at which all qualified voters residing within the boundaries of the seven high school and unified school districts were eligible to vote. The election was held on October 6, 1959; and by an overwhelming vote, the Imperial Valley Junior College District was established. This was followed by the election of the first Board of Trustees, one from each of the seven high school or unified school districts served by the Imperial Junior College District. Approval for construction of a campus followed in 1960 when District residents set an all-time state record, voting by a ratio of thirteen to one in favor of bonds to finance a new IVC campus on Aten Road.

IVC Roots Run Deep

But even though the grand opening of the main campus in 1962 signaled a new era for higher education in the Imperial County, IVC's roots run even deeper into the county's heritage. Exactly 40 years before the opening of the new campus, classes of Central Junior College began on the grounds of Central Union High School in El Centro—in September 1922. Two years later, in the fall of 1924, instruction began at a second college, Brawley Junior College, on the grounds of Brawley Union High School.

Enrollment increased in both schools until World War II, when attendance dropped sharply. Brawley Junior College was forced, by lack of attendance, to discontinue classes at the close of the 1947 school year.

In the fall of 1951, Central Junior College students petitioned the Central Union High School Board of Trustees for a more representative name for the college because it was now serving students from all of the Imperial Valley. The board agreed to change the college's name to Imperial Valley College.

Under the administration of the Central Union High School District, IVC gained recognition as an accredited institution of higher education. As the institution grew with the community, this growth was reflected in the steady rise in enrollment and in the diversity of courses and curricula.

When IVC and the new college district finally received its own campus in 1962, it was basic. The facility consisted of a library, science laboratories, fine arts rooms, a student activities building, academic classrooms, administration and faculty offices, social science rooms, physical education shower and locker rooms, and agricultural education classrooms and a shop.

Campus Expansion

A steady growth pattern began in April 1967 with the addition of a gymnasium that was designed to house sporting and theater events. It was dedicated on May 26, 1966 as the John A. "Buck" DePaoli Sports Complex in honor of the late John A. "Buck" DePaoli who served IVC for 30 years, of which 14 years were as Superintendent/President.

The Meyer Center for Business and Commerce was dedicated February 20, 1972. It originally was located in the 900 building and is now housed in the 800 building.

Other major building projects that followed included:

- The Associated Students Activities Building, 1971;
- The Spencer Library Media Center, in 1975, named in honor of the late Terrel Spencer, President Emeritus and IVC's second President.
- The Swimming Pool Complex, 1975;
- The Preschool, 1981.

In November 1986, Imperial Valley College began construction of a 17,500 square foot fully state funded building that now houses Health Technologies programs as well as the Mel Wendrick Access Center for Disabled Student Programs and Services. The \$2.2 million project was completed at the end of 1987.

IVC passed its second General Obligation bond in 1987: A \$2.5 million measure that allowed the college to do major campus refurbishing and other general improvements including the opening of an extended-campus center in El Centro, rejuvenating classrooms, the library, the college center, the counseling center, the print shop; doubling the size of the Meyer Center for Business and Commerce; and computerizing the energy control system.

In May 1999, the Spencer Library Media Center opened a 4,200 square foot addition that houses the Learning Center and Tutoring Center. The \$1,000,000 project included a complete renovation of the existing library.

In April 2002, the Jean Raulston Reading/Writing Lab was relocated to the newly constructed 2600 building, sharing space there with the Pauline Benoit Rice Language Lab.

The Childhood Education Center celebrated its grand opening on October 28, 1991 and the Infant Care Center was built and opened for service in June of 1999.

The Military and Veteran Success Center, which serves both veterans of all ages as well as active duty military, celebrated its grand opening in 2016.

Campus Redefined

Thanks to the passage of two additional board measures (in 2004 and 2010), the IVC campus marked its 50th Anniversary in 2012 with a dramatic transformation, adding facilities as it redefined itself as an institution committed to both sustainability and mobility for future generations.

This milestone was recognized in 2010 when Imperial Valley College received a regional planning award for design, development and implementation of its campus expansion project.

The Compass Blueprint Excellence Award for Visionary Planning for Prosperity was presented by the Southern California Association of Governments. IVC was one of four projects in Southern California to receive a 2010 Excellence Award and was the only Community College to receive one.

This award winning expansion plan includes Xeriscape landscaping and people-scaled features have not only altered the aesthetics of this campus, but have redefined the pivotal role integrated uses can play with the incorporation of expanded public transit facilities.

Funding has come through a variety of sources including the \$58.6 million Measure L bond issue passed in 2004 and the \$80 million Measure J measure approved in 2010.

Transportation improvements were funded in partnership with the U.S. Department of Transportation and the Imperial County Transportation Commission (ICTC).

IVC and the ICTC partnered to develop transit centers on campus which have improved the safety and security of transit riders. Other circulation improvements included two additional entrances to the campus.

The most significant building in the Measure L funded expansion was the 2700 building. It is a 70,000 square foot, two-story, classroom and laboratory building that opened to students in January 2010. This building became the first LEED certified science building (silver) in Southern California and the first publicly-owned LEED certified building in Imperial County.

Measure J provided the funding for two new Career Technical Education (CTE) buildings which opened for classes in the Fall 2014. These CTE buildings are home to classrooms that train our residents for the careers of the future, including alternative energy development as well as law enforcement, emergency medical technician, and automotive technology. The buildings are also built to LEED standards.

Just north of the CTE buildings, IVC opened its 3-megawatt solar field in early 2017 which provides power to the campus. IVC entered into a Power Purchase Agreement with Green Light Energy Corporation who completed the photovoltaic solar facility on 17 acres of the Aten Road campus with assistance from its Owner Engineer, ZGlobal Inc. a local engineering firm. This facility is expected to save the college \$8 million over the 25-year life of the project as well as drastically reduce the college's carbon footprint. The solar field placed IVC among the energy conservation leaders in California's 72 community college districts and 113 colleges.

Amid all of this expansion, IVC also lost a historic part of the campus in 2014 when the 500 Buildings were demolished. These "tin" buildings were once situated on the Imperial High School grounds and housed the IVC campus when it first became a district in 1960. They were later moved to Aten Road and housed the Imperial Valley campus of San Diego State University for some time as well as other IVC offices. The demolition was part of an agreement with the State of California when it provided matching funds for renovation of other classrooms on campus.

The following Superintendent/Presidents have served the District and College since its formation:

Milo P. Johnson	1960-1963
Dr. Terrel Spencer	1963-1978
Dr. Dan Angel	1978-1981
Dr. John A. DePaoli	1981-1995
Dr. Gilbert M. Dominguez	1996-2002
Dr. Paul Pai	2003-2007
Dr. Ed Gould	2008-2011
Dr. Victor M. Jaime	2012-Present

Strategic Educational Master Plan

The Strategic Educational Master Plan (SEMP) for 2015-2021 was developed by the Strategic Educational Master Plan Committee which includes representatives from all campus constituencies including faculty, classified staff, students, and administration. The SEMP combines the components of the Strategic Plan and the Educational Master Plan into one comprehensive planning document. Developed in collaboration with campus constituencies and including members of the Imperial Community College District Board of Trustees and the Imperial County community through the visioning process and a

county wide survey, the plan provides a sense of vision and a guide for multi-year planning. A comprehensive analysis of both internal and external factors influencing future development of the College, and an examination of the present and anticipated development of instructional and support services, as well as technology, facilities, staffing, marketing, and professional development is included in the plan.

This all inclusive framework enabled the college to identify the most critical and campus-wide priorities and strategic goals for the college as follows:

- Student Success
- Teaching and Learning Effectiveness
- Access and Growth
- Community, Economic & Workforce Development
- Organizational Effectiveness

The Strategic Educational Master Plan addresses how the college can best implement planned improvements based on the institutional resources, required and desired timeframes, and final recommendations and strategies, all in line with IVC's mission, vision, and values. Specific objectives were also identified under each of the five goals listed above. The plan may be found on our website at www.imperial.edu or the contacting the President's office at (760) 355-6219.

College Mission

The mission of Imperial Valley College is to foster excellence in education that challenges students of every background to develop their intellect, character, and abilities; to assist students in achieving their educational and career goals; and to be responsive to the greater community.

Types of Courses and Programs

In order that Imperial Valley College may achieve its goal of serving all students who desire to learn, a variety of courses are offered. Some equip a student with job entry-level skills, and other courses provide a general education for all students to assist them in living meaningful and productive lives in a complex society. Still other types of courses provide the basis for professional training offered by four year colleges and universities. Regardless of the interests of the students, the first two years of college work normally can be completed at Imperial Valley College. Thus, students have an opportunity to begin their advanced education while still residing at home. Not only can this opportunity be of great financial assistance, but it offers an excellent transition between the high school campus and the large, often impersonal, four-year college campus. The intimate, though scholarly, atmosphere of the college, the opportunity for each student to know instructors personally, and the chance to participate in the counseling program, all offer invaluable opportunities to the student. Not only can the student receive excellent personal assistance with work, but the opportunities for leadership in student affairs are increased.

Through the counseling program, a close scrutiny is given to the courses in which a student enrolls. The student plans ahead, sets up goals and systematically includes those courses of study that will be of the greatest benefit.

Many of the needs of the student who seeks employment at the end of the sophomore year can be met by a variety of occupational courses. In addition to offering a breadth of education, these courses meet specific needs in the shortest possible time to prepare the student for a field of employment.

These courses also offer a well-organized general education program to meet the needs of the individual who has only two years to devote to post-high school education. The community college program also includes courses of study which may be taken by adults who can demonstrate their ability to do college work but who have not had the opportunity to complete high school. Evidence of success in classes of college level will permit these adults to continue their educational endeavors.

Coordinated with the general divisions of courses at the college are programs designed with specific types of students in mind: students who can devote only evenings to school; students who cannot fully participate in regular classes on the main campus; students who can coordinate their college study with a program of employment; the outstanding high school 11th and 12th grade students who can profit by special work at the college level; and students with disabilities.

Degrees

The Board of Trustees, on recommendation of the Superintendent/President and faculty of the college, is authorized in accordance with Article 12, Section 102, of the State Administrative Code, Title 5, to confer the Associate in Arts (A.A.), the Associate in Science (A.S.), the Associate in Arts for Transfer (A.A.-T), and the Associate in Science for Transfer (A.S.-T.) degrees. Conditions under which the degrees are granted are outlined in the section on graduation requirements.

The community college degree is awarded to a student who fulfills a two-year organized program of work, either occupational-vocational-technical or lower-division four-year college. A student who wishes to transfer to the upper division of a four-year college must satisfy the course, unit, and grade requirements of the college he/she wishes to enter.

Institutional Student Learning Outcomes

The graduates of Imperial Valley College will demonstrate communication skills, critical thinking skills, personal responsibility, information literacy, and global awareness as a result of their educational experience at this institution.

1. Communication Skills

Definition: Communication is the activity of conveying information through the exchange of ideas and information through speech, visuals, signals/symbols, writing, or behavior. It's the meaningful exchange of information from one person to another. Communication may be intentional or unintentional and may take linguistic or nonlinguistic forms.

Goal: Students will develop effective communication skills for diverse situations.

Students will be able to:

- Recognize that communication and expression may be written or oral, verbal or nonverbal, informational or artistic.
- Develop analytical reading, writing, speaking, and listening skills including evaluation, synthesis, and research.
- Create substantially error-free writing using appropriate vocabulary.
- Convey ideas clearly, accurately and logically.
- Recognize cultural differences in communication and nonverbal cues. Speak effectively to deliver focused and coherent presentations.
- Apply interpersonal communication skills to work in a team structure.

2. Critical Thinking

Definition: Critical thinking is the disciplined process of actively analyzing, synthesizing, and evaluating information gathered from observation, reasoning, and communication, used to draw conclusions and take action.

Goal: Students will be able to gather and synthesize relevant information, evaluate alternatives, and implement creative and effective solutions.

Students will be able to:

- Define and analyze problems clearly.
- Think independently, creatively, logically, and effectively.
- Apply appropriate problem-solving methods.
- Analyze and synthesize information from multiple perspectives.
- Identify purpose and bias in communication.
- Identify further problems for study.

3. Personal Responsibility

Definition: Personal responsibility is the development of one's personal character and skills designing a life that honors values and purpose. It includes recognizing that the choices and obligations we make in life impact us and others mentally, physically, and emotionally. Personal responsibility includes learning how to respond wisely to opportunities and challenges. It can also involve learning how to recognize and correct mistakes; monitor and judge our own actions and motivations; and develop respect for ourselves and others.

Goal: Students will become independent learners who understand and demonstrate the lifelong skills necessary for physical, social, economic, mental, and emotional health.

Students will be able to:

- Set clear personal, educational, and career goals. Identify and implement lifestyle choices that promote self-reliance, financial literacy, and physical, mental/emotional, and social health.

- Develop a strong work ethic consciously doing one's very best. This includes the practice of honesty and ethical behavior in the academic environment and effective time management that honors the self and others.
- Recognize and act on the obligation to form one's own judgment and engage diverse perspectives as a resource for learning, citizenship, and work.
- Develop and demonstrate reasoning in ways that incorporates ethics, goals, and priorities.
- Demonstrate intellectual exploration skills to include the use of all available resources.
- Develop and use a clear set of values and an ethical framework in their personal, educational, and professional endeavors.
- Demonstrate an understanding of the diversity of human perspectives, along with the causes and effects of individual decisions and actions.

4. Information Literacy

Definition: Information literacy is the ability to identify an information need, and locate, analyze, evaluate, and effectively use that information. Information literacy forms the basis for lifelong learning. It is common to all disciplines, to all learning environments, and to all levels of education.

Goal: Students will know when information is needed and have the ability to locate, analyze, evaluate, and effectively use it.

Students will be able to:

- Determine the nature and extent of information needed.
- Access print and electronic information technologies.
- Use appropriate search strategies to access information.
- Critically evaluate the accuracy, credibility and relevance of sources and information.
- Coherently, ethically and legally incorporate information into projects and assignments.
- Effectively utilize libraries as a multiplatform information resource.

5. Global Awareness

Definition: Global awareness is the acknowledgement that we live and work with people with diverse backgrounds. It includes an understanding of how the individual fits within evolving social, cultural, and economic contexts at global, national, and local levels.

Goal: Students will define and understand their role and responsibilities as global citizens.

Students will be able to:

- Compare and contrast groups of different backgrounds, beliefs, appearances, and lifestyles.
- Analyze and synthesize cultural products (e.g., art, literature, newspaper articles, and cinema).
- Communicate, interact, and work with individuals from other cultural and ethnic groups.
