

Smoother Transition to Online is Here!

Receive free access to a downloadable Canvas shell that contains a basic course structure based on a weekly module approach to deliver an online class.

Each module has the same content structure:

- Weekly Class Overview (what we are doing this week)
- Content (reading assignments; films links, etc.)
- Assignments (assigned readings; homework; discussion post)
- Discussion Post (student posts moderated by professor)
- Summary (overview of what was covered in the module and transition into the next module)
