What do you like the most about the Math Lab?

Representative responses:

What I like is being able to check out textbooks I don't buy.

I use MathXL a lot.

When I get something wrong I can check it and it shows me how to do another example.

I think the tutors are helpful. There should be more older tutors, I don't think the younger ones help.

I did my homework there a lot and it was good because they help me when I got stuck.

I got good practice for my tests.
